EDUCATION	
DePaul University B.S. in Mathematics and Computer Science GPA: 3.88, Major GPA: 3.95	Chicago, IL Sep. 2023 – Exp. June 2027
Stanford University Visiting Student – Coursework: CS 229 (Machine Learning)	Stanford, CA Summer 2026
WORK EXPERIENCE	
Software Engineer Intern Airblox - Built a reusable React component library from Figma designs (atoms, molecules, organisms) using Mantine and Storybook to support a full website redesign targeting end users. - Developed production-ready components with configurable props, documentation, and Storybook stories, enabling consistent usage across the engineering team. - Collaborated with design and engineering leads in an agile workflow, using Git/GitLab for PRs and code reviews and Jira/Slack for sprint planning, standups, and issue tracking.	Schaumburg, IL June 2025 – Mar. 2026
RESEARCH	
Undergraduate Research (Independent Study) DePaul University, College of Science and Health Knot Mosaics: Designing a search algorithm to decide whether a given knot is realizable as an $N \times N$ mosaic over the 11 standard knot tiles and to return an explicit tile configuration, with a Pygame renderer for candidate grids. Convex Optimization: Implemented the AGD-Until-Guilty framework in JAX (accelerated descent with a convexity certificate, non-convex pair exploitation, guarded outer loop), surfacing witness pairs as explicit counterexamples on convex and non-convex test functions.	Chicago, IL Jan. 2025 – Present
PROJECTS	
Kaza Namazlarim, Next.js, TypeScript, Supabase (PostgreSQL), Clerk Auth, Railway - Identified a gap in existing prayer tracking tools and built and deployed a bilingual (EN/TR) web app for Muslim users to log and track missed prayers, designed for real-world use. - Integrated the Adhan library for geolocation-aware prayer time calculation across multiple Islamic jurisprudence methods, paired with locale-based routing via next-intl for full internationalization. - Designed a Supabase schema for per-user prayer logs with server actions handling CRUD, settings persistence, and streak and stats aggregation across a responsive PWA-ready interface. - Implemented bulk prayer entry via date-range and count-based server actions with chunked batch inserts, alongside per-prayer recovery tracking and soft-delete logic for data integrity.	Apr. 2026
NASA Asteroid Threat Classifier, Next.js, FastAPI, TensorFlow/Keras, Python, Railway - Engineered a full-stack ML application that fetches live orbital data from NASA's NeoWs API to classify near-Earth asteroids as hazardous or safe using a custom-trained 3-layer neural network. - Optimized model performance for rare-event detection using class weights and StandardScaler normalization, achieving high precision on historical NEO datasets and deploying via a containerized FastAPI backend. - Developed a Next.js dashboard with Mantine to display real-time predictions, model confidence scores, and physical asteroid metrics through parallelized server-side API requests.	Apr. 2026
Master the Masters, Next.js, TypeScript, Prisma, Supabase (PostgreSQL), Mantine - Built a centralized academic tracker for graduate school applications, featuring multi-tier organization, location-based grouping, and automated logo enrichment via external branding APIs. - Architected a relational schema in Supabase to support complex CRUD operations, implementing soft-delete logic with reason-tracking and restore capabilities for data persistence. - Designed a high-performance filtering system and responsive UI using Mantine components and Tailwind CSS to manage large datasets across desktop and mobile views.	Aug. 2025
SKILLS	
Programming Languages: Python, C++, C#, Swift, Java, JavaScript, TypeScript Tools and Frameworks: Git, GitLab, React, Next.js, NumPy, TensorFlow, Tkinter, SQLite3, Figma, Storybook, Jira	
CERTIFICATIONS	
Machine Learning Specialization – Stanford University (Coursera, 2025)	
AWARDS	
Dean's List, DePaul University Presidential Scholarship, DePaul University	Sep. 2023 – Present Sep. 2023
LEADERSHIP/MENTORSHIP	
Founding Treasurer, DePaul AI Club, DePaul University Founding Treasurer, Turkish Student Association, DePaul University Student Mentor Keystone Youth Center Mentor for middle school through college students, providing academic guidance, emotional support, and organizing programs that foster engagement and personal growth.	Mar. 2026 – Present Jan. 2025 – Present Chicago, IL Aug. 2022 – Present
